

LEVEL 01 - COORDINATION PLAN

Visible sheet plus publisher-supplied IFC, IDS and transmittal data

PACKAGE CONTENTS

01 coordination-model.ifc
IFC4 / STEP P21

02 requirements.ids
IDS 1.0 / XML

03 transmittal.json
Issue metadata / JSON

04 requirements.ids
Duplicate selector candidate

05 ../unsafe-notes.xml
Unsafe declared name

TEST INTENT

- Report active/external features
- Reject ambiguous IDS selection
- Flag type and filename hazards

DIGITAL DELIVERY MANIFEST

Exact embedded-member identities and expected PDFValidator behavior

ORIGINAL NAME	DECLARED TYPE	DETECTED TYPE	AF RELATION	TEST PURPOSE	TYPED OUTPUT
coordination-model.ifc	text/plain	model/step	Data	IFC4 Part 21 carrier preflight	selected_step_p21
requirements.ids	application/xml	application/xml	Supplement	IDS XML root and exact bytes	selected_xml
transmittal.json	application/json	application/json	Data	Issue metadata and JSON syntax	selected_json
requirements.ids	application/xml	application/xml	Supplement	Intentional ambiguous second match	selected_xml
../unsafe-notes.xml	application/xml	application/xml	Supplement	Filename evidence must never become a path	none

EXACT SELECTOR CONFIGURATION

```
XML  original_filename = requirements.ids
    detected_media_type = application/xml
    xml_root_qname = {http://standards.buildingsmart.org/IDS}ids
JSON original_filename = transmittal.json
    detected_media_type = application/json
STEP original_filename = coordination-model.ifc
    detected_media_type = model/step; FILE_SCHEMA = IFC4
```

SCOPE NOTE

This fixture validates the PDF package and typed carrier boundary only. It makes no claim of IFC, IDS, PDF/A, design or construction conformance.
Repository-owned synthetic data - CC0-1.0 - no customer, council or project information.

EXPECTED OUTCOME

- safe_static_package_v1: FAIL
- Duplicate requirements.ids makes XML selection ambiguous.
- Declared text/plain conflicts with the detected STEP carrier.
- OpenAction JavaScript and an external URI are inventoried only.
- The ../unsafe-notes.xml name remains evidence, never a path.
- No active content is executed and no external resource is fetched.
